

# Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at [support@livelyroot.com](mailto:support@livelyroot.com). We are incredibly thankful to have the opportunity to share our love of plants with you.

# Air Plant

*Tillandsia species*

Air plants are a variety of Epiphytes, indicating they don't need soil to grow. They support themselves with their roots on a tree or other plant but aren't considered a parasite.

**Indoor plant**

60-90°

**Outdoor plant**

60-90°

## ✓ Success Tips

### Unwrapping your plant:

When you unwrap your airplant, find a home for it that gets at least 2-3 hours of full sun a day. You can hang, mount or let your air plant sit freely on a shelf.

### Watering and drainage:

Put your Tillandsia into a bucket or container of lukewarm water for 30 minutes. Afterwards, turn the plant upside down and shake it to remove any excess moisture: you don't want any water to remain in the crown. Normally, a good "soak" once a week will suffice for species with very silvery or greyish foliage. For more mesic types, with green foliage, two or three weekly soakings are necessary.

## ☼ Care

Keep in normal indoor or mild outdoor temperatures. Bring inside when temperatures dip below 60°F.

## 💧 Water

Soak in tepid water for 30 minutes once a week. Afterward, turn upside down to drain.

## ☀ Light

Bright, indirect light is best.

## 🐾 Pets

Safe for pets.

## Impress your friends with this cool fact

Flowers are aromatic nightly to entice sphinx moths to pollinate them, although the flowers yield no nectar.
