

Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at support@livelyroot.com. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) ↘

Alocasia

Alocasia species

Alocasia are a genus of plants that are popular among many for their beautiful and unique dark green foliage. Please read on for how to care for and enjoy them for years to come.

Indoor plant

65°–75°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. There is a layer of moss next to the soil that can remain as a mulch, or you can choose to remove it.

Watering and drainage:

When watering your new plant, remove the grower pot from the container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☼ Care

These plants require plenty of humidity and love to thrive.

💧 Water

Allow the soil to dry out completely between waterings.

☀ Light

Medium to bright indirect light. Never direct sunlight.

🐱 Pets

Toxic to Touch.

Impress your friends with this cool fact

You might see your Alocasia sweat. Guttation, as it's called in the horticulture world, is a way to restore balance to their nutrient and water content.
