

Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at support@livelyroot.com. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) ↘

Fern

Asplenium

Asplenium ferns often have more substantial fronds than other ferns. They prefer medium humidity and bright indirect light.

Indoor plant

70-80°

Outdoor plant

70-80°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. There is a layer of moss next to the soil that can remain as a mulch, or you can choose to remove it.

Watering and drainage:

When watering your new plant, remove the grower pot from the container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☼ Care

For ferns, these guys are a bit easier. Still, make sure they get enough humidity!

💧 Water

Keep the soil moist but not soggy. Use filtered or bottled water.

☀ Light

Give this plant bright, indirect light in a southern-facing window or a combination of exposures.

🐾 Pets

Pet-Safe.

Impress your friends with this cool fact

These ferns are often epiphytes which means it attaches itself to a host plant in its native environment.
