

Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at support@livelyroot.com. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) ↘

Milkweed

Asclepias species

Striped caterpillars that morph into monarch butterflies are attracted to this plant as a host. These caterpillars have a greater survival rate and less developmental time on *A. curassavica* than on the more general milkweed.

Outdoor plant

65°–75°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☼ Care

This plant thrives in warmer and humid temperatures. Keep it out of cold drafts.

💧 Water

This plant prefers moist, well-draining soil.

☀ Light

Add this to your annual or perennial garden in full sun (6-8 hours) and watch it attract pollinators!

🐱 Pets

Toxic to pets.

Impress your friends with this cool fact

Flowers are aromatic nightly to entice sphinx moths to pollinate them, although the flowers yield no nectar.
