# New Zealand Flax

*Phormium tenax*

The New Zealand flax tropical-looking, easy-care plant features long colorful sword-like leaves to emerge from a clump. Multicolored foliage of dark red, green, golden, purple, and burgundy make this an eye-catching display.

**Indoor plant**

36°–100°

## ✓ Success Tips

### Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. There is a layer of moss next to the soil that can remain as a mulch, or you can choose to remove it.

### Watering and drainage:

When watering your new plant, remove the grower pot from the container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

## ☼ Care

This plant will not thrive in conditions colder than 20-25°F for long periods of time and will damage the leaves, stems and roots.

## 💧 Water

Water regularly to provide consistently moist soil. If planted as an indoor plant, keep the soil consistently moist but not soggy.

## ☀ Light

Full sun (6-8 hours) to part sun (4-6 hours)

## 🐾 Pets

Safe for pets.

## Impress your friends with this cool fact

Flowers are aromatic nightly to entice sphinx moths to pollinate them, although the flowers yield no nectar.
