Pothos Silver Splash

Scindapsus pictus 'Exotica' species

Our Pothos 'Silver Splash' is really not a pothos, but its common name picks up the many similarities. It grows to be 3 feet indoors and carries with it a unique appeal of shimmer and glisten on the silver leaf splashes.

Indoor plant

65°–85°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☼ Care

Ideally, keep it on 65–70° at night and upwards of 86°F during daylight hours.

☀ Light

This plant prefers bright, indirect light to promote leaf growth!

💧 Water

Keep the plant in well draining soil and consistently moist for the best results.

🐱 Pets

Toxic if ingested

Impress your friends with this cool fact

If you live in a warm climate and grow outside, it can reach 10 feet in mature growth; however, it will stretch to 3 feet in length if it is an indoor plant!
