

Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at **support@livelyroot.com**. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) ↘

Ric Rac Cactus

Disocactus anguliger species

The Ric Rac Orchid Cactus bears stems. Off these stems, orchid-like fragrant flowers bloom after the third year of growth. Their unique zig-zag stem form hangs beautifully from a basket.

Indoor plant

55°–75°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☼ Care

Keep out of extreme heat or cold in a shaded area outside or bright, indirect light inside between 52°–77°F.

💧 Water

Water thoroughly and then let her dry out between waterings. Slow down watering in the winter months.

☀ Light

Set your Ric Rac Cactus in bright, indirect light for best results!

🐱 Pets

Non-Toxic for pets.

Impress your friends with this cool fact

Often people will mistake the green stems for leaves on this cactus. They are leafless; therefore, the stems perform photosynthesis.
