

Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at **support@livelyroot.com**. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) ↘

Calathea Rattlesnake

Goepertia lancifolia species

You'll see a lot of movement from the Rattlesnake Plant as its leaves rise and lower by the time of day it is. When it's nightfall, the leaves raise as if trying to reach the sky, giving you a peek at its purple underside.

Indoor plant

65°–75°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☼ Care

Avoid any sudden temperature changes. Keep humidity high in warmer temperatures.

☀ Light

This plant enjoys bright to medium indirect light.

💧 Water

Keep the soil slightly moist and water when the soil is dry on the top 2". Let fully drain after watering. Use filtered water.

🐱 Pets

Non-Toxic for pets.

Impress your friends with this cool fact

You can set your clock to the rising and lowering of this plant's leaves, caused by turgor pressure in their base.
