

# Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at **support@livelyroot.com**. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) 

# Kangaroo Paw

## *Anigozanthos species*

The Kangaroo Paw (*Anigozanthos*) is a bird pollinator flower. Their tubular blooms come in various brilliant colors and are sometimes covered by contrasting colorful filaments that give a velvety appearance.

### Outdoor plant

65°–100°

### ✓ Success Tips

#### Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. There is a layer of moss next to the soil that can remain as a mulch, or you can choose to remove it.

#### Watering and drainage:

When watering your new plant, remove the grower pot from the container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

### ☀ Care

Use as a perennial in plant zones 10-11 and annuals in all other zones.

### 💧 Water

We recommend regular irrigation for several months to get these plants established.

### ☀ Light

Full sun (6-8 hours)

### 🐱 Pets

Toxic for pets to ingest.

## Impress your friends with this cool fact

The Kangaroo paw is Western Australia's floral emblem.
