

Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at **support@livelyroot.com**. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) 

Lipstick Plant

Aeschynanthus radicans species

This plant produces what looks like miniature red lipstick tubes on their green vines. They bloom throughout the spring and summer, so fertilize monthly for that classic color to flourish.

Indoor plant

65°–80°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☼ Care

Avoid cooler temperatures under 70°F. If planted outside, sit in the shade but give brighter, indirect light.

💧 Water

Keep your plant's soil consistently moist like a wrung out sponge but not soggy.

☀ Light

This plant prefers bright, indirect light to promote blooming!

🐱 Pets

Non-Toxic for pets.

Impress your friends with this cool fact

In the wild, the Lipstick Plant grows in the crooks of tropical trees hanging on by aerial roots.
