# Philodendron

*Philodendron species*

**Indoor plant**

65°–75°

Philodendrons are an easy care, unique, yet common houseplant. They are perfect for anyone who appreciates plants, regardless of experience.

## ✓ Success Tips

### Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not replot for the first 30 days after it arrives to avoid transplant shock.

### Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

## ☰ Care

Easy to care for, easy to love.

## ☀ Light

Medium to bright indirect light. Never direct sunlight.

## 💧 Water

Enjoys being on the moist, but not soggy side.

## 🐱 Pets

Can be toxic to pets.

## Impress your friends with this cool fact

The name philodendron is derived from the Greek words philo (love) and dendron (tree).
