# Pink Flamingo Flower

*Anthurium andraeanum* Pink species

Our Pink Flamingo Flower is native to the tropical forests of Central and South America. The colorful pink hue is a tear-shaped spathe with a long spadix where the tiny flowers are on display.

**Indoor plant**

60°–90°

## ✓ Success Tips

### Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

### Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

## ☀ Care

Ideally, the Flamingo Flower likes it on average of 68° at night and upwards of 86°F during daylight hours.

## 💧 Water

Keep the soil slightly moist and bottom water. Use filtered or bottled water and water enough to discharge out of the drainage holes.

## ☀ Light

This plant prefers bright, indirect light to promote blooming!

## 🐱 Pets

Toxic if ingested.

## Impress your friends with this cool fact

Each plant lives up to 10 years, but if propagated, it can live for decades.
