## ✓ Success Tips

### Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

### Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

## ☰ Care

Very easy to care for and perfect for beginners.

## ☀ Light

Best in medium to bright indirect light.

## 💧 Water

Water well and then allow the soil to dry out between each watering.

## 🐾 Pets

Non-Toxic to Dogs, Cats & Horses.

## Impress your friends with this cool fact

Popular for growing outdoors (but very suitable for indoor growing as well), this palm gets its name from its small, ornamental fruits that resemble dates.
