

Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at **support@livelyroot.com**. We are incredibly thankful to have the opportunity to share our love of plants with you.

(Care Card on reverse!) 

Sage

Salvia officinalis species

Sage is a great companion plant to strawberries, tomatoes, carrots, and cabbage. One herb that it prefers to be next to is rosemary! If you let it flower, the beneficial insects will come-a-calling to help your garden.

Indoor plant

60°–70°

✓ Success Tips

Unwrapping your plant:

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. Do not repot for the first 30 days after it arrives to avoid transplant shock.

Watering and drainage:

When watering your new plant, remove the grower pot from the eco pot or decorative container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

☰ Care

This plant can withstand a frost after its fully established and rooted. It does best in temps between 60°F-70°F.

☁ Water

Keep the plant in well draining soil and consistently moist for the best results.

☀ Light

Plant in full sun (6-8 hours) to produce flowering stems.

🐱 Pets

Safe for humans, pets, cats and dogs.

Impress your friends with this cool fact

Sage is part of the mint family (Lamiaceae) and comes from the word meaning wise.
