

# Welcome To Lively Root

We are delighted you have grown your Lively Root plant family. If you have any problems, need plant advice, or just want to have a great plant conversation, email us any time at [support@livelyroot.com](mailto:support@livelyroot.com). We are incredibly thankful to have the opportunity to share our love of plants with you.

# Syngonium

## Syngonium

These plants are a climbing variety, their leaves drape over the edge of the pot. They are easy to care for and super vigorous.

**Indoor plant**  
60-80°

### **Success Tips**

#### **Unwrapping your plant:**

To help your plant receive the oxygen and water it needs, please remove the plant from its dirt bag. There is a layer of moss next to the soil that can remain as a mulch, or you can choose to remove it.

#### **Watering and drainage:**

When watering your new plant, remove the grower pot from the container and place it over a sink. Allow the plant to drain fully before putting the grower pot back into the decorative container.

### **Care**

Keep them at a medium humidity and in bright light to keep them happy!

### **Water**

Allow the soil to dry between waterings. Use filtered or bottled water.

### **Light**

Bright, indirect light is best for growing!

### **Pets**

Toxic to Ingest.

## Impress your friends with this cool fact

As your plant matures, their leaves change shape drastically, making young leaves and older leaves almost look like they're part of a different plant.
